

## Goals for this session:

To understand the importance of using ILOs in developing units of learning

To examine ways of clustering ILOs for units of learning

To understand the importance of a well worded title for a unit of learning

# Clustering ILOs Into Learning Units

Ways to cluster ILOs together. . .

1. Chronological

2. Location

3. Physical Characteristics

4. Sequentially

5. Concept relatedness

6. Central Questions

7. Learning Related Units

8. Utilization

Titles of learning units are important because:

1. Help you limit the focus of the unit

2. Define the focus

3. Set the tone for the information

If a title is not readily identifiable, the cluster of information needs to be examined. It may be too general to meet the students' needs. Or it may be a hodgepodge of ideas needing further clustering and thought.
